

TRANZ 330

Versatile enough to handle a variety of applications, a terminal that lets you add new functions when our business needs change.

TRANZ gives retailers a fast, low-cost way to authorize and process credit card sales and guarantee checks.

It lets retailers accept debit (ATM) cards in payment through an optional PIN pad. Plus, it supports other point-of-services (POS) applications involving the transfer of value, such as healthcare and government benefits programs.

With TRANZ 330, you can connect a slip, roll, or sprocket printer for fast, accurate sales receipts, and reports. And you can quickly add, update, and create applications using TCL™ the VeriFone terminal control language designed specifically for transaction processing.

TRANZ 330 is so easy to use, you can complete a typical transaction with just a few keystrokes. It displays large, legible numbers, and letters providing simple, easy-to-understand prompts that guide you through each step to a typical transaction.

TRANZ 330

Features

Accepts all major credit, debit, and private-label cards, providing low-cost credit card authorization, check guarantee and data capture for a variety of retail applications
